

MOBILE TURNSTILE

Portable Access Control

OVERVIEW

Custom designed and built refurbished shipping containers to suit your security needs, providing you with an on-the-go access control solution.

- Rapid security deployment
- Implement physical access control within an hour

SPECIFICATIONS

Each 20-foot (6 metre) or 40-foot (12 metre) refurbished container can be designed to incorporate a number of turnstiles and wheelchair gates, together with a combination of the following optional features and extras:

- Employee breathalyzer and search areas
- Bullet-resistant windows and walling
- Ablutions and showers
- Security office air-conditioning units
- Windows with burglar bars for ventilation
- Desk and furniture for security guard to carry out his duties
- Night time lighting
- Lockers
- Roller shutter doors and gas assisted lifted entrance walls
- Steel doors with heavy-duty lock set
- Electric for any requirement
- Any other requirement which you may need

The flexibility of add-on elements means that the containerised units can be used as surveillance camera rooms, security control rooms, computer/server rooms and security guardrooms.

- **Save cash:** No need for building plans, approvals, laying of foundations and construction. Your costs per square metre will be substantially lower than building from scratch.
- **Durability:** Repurposed containers are robust and are ideal for integration with a security perimeter or fence.
- **Pick up and go:** Your container offers great flexibility and can be easily moved to another location.
